MST Public School has experienced an enlightened journey of 22 years, in which it has achieved unparalleled heights of success. Education encompasses more than just knowledge and knowing. It is a harmonious blend of academia, arts, sports, emotions, attitudes, nature and life alike. School life teaches a child to adopt and manage many people from diverse backgrounds. That is why the role of a school in a student's life is very important and it is considered to be their second home. The

school is synonymous with their teaching fraternity. Today we must consider all those who have helped to shape who we are and acknowledge our stakeholders, both past and present, who have influenced the character and values that embody the vibrant, engaging and safe environment that we see today.

Excellence is never an accident. It is always the result of high intention, sincere efforts, intelligent direction and skillful execution. These words of wisdom, best describe the present state of MST public school.
